

14H HYDRAULIC CIRCULAR SAW

CONCRETE. STONE. MASONRY. UNSTOPPABLE

14H CIRCULAR SAW EXTRAORDINARY PERFORMANCE FOR ORDINARY TASKS

The 14H hydraulic direct-drive saw is a rugged and versatile tool that cuts cleanly and quickly through concrete, steel, stone, composition material, or hard fiber. The slim line design of the saw allows cuts to be made within inches of a wall or an obstruction and hydraulic power means less vibration. The saw is equipped with an adjustable blade guard, water hose connection for wet cutting and 12-inch (30 cm) long hose whips.
